

ActiveRecord::Base

```
classDiagram
    class ActiveRecordBase["ActiveRecord::Base"]
    class User
    class Micropost
    ActiveRecordBase <|-- User
    ActiveRecordBase <|-- Micropost
```

A UML class diagram illustrating inheritance. At the top is a red box labeled 'ActiveRecord::Base'. Below it are two boxes: a blue box labeled 'User' on the left and a magenta box labeled 'Micropost' on the right. A horizontal line connects the two lower boxes, and a vertical line with an open triangle arrowhead points from the center of this horizontal line up to the 'ActiveRecord::Base' box, indicating that both 'User' and 'Micropost' inherit from 'ActiveRecord::Base'.

User

Micropost
